

## Project Profile

---

### Mechanical Rehabilitation

# J.C. Boyle Fish Screen Rehabilitation

JC Boyle is located on the Klamath River about one mile down-stream from the bridge crossing Oregon State Highway 21.

In February of 2004 the JR Merit team was called upon to deploy our mechanical team to evaluate the condition of the (4) existing fish screens and develop a rehabilitation plan.

The project presented some unique challenges due to the difficult location of the units and the time frame to accomplish the objectives. In total (4) fish screen were coordinated & refurbished by the JR Merit Team in a quality professional manner, within the clients schedule and under the financial budget.

Location: Klamath Falls, Oregon

Client: Pacific Power
